

A specialised financing fund targeting 10%+ annual net returns managed by proven UK and German real estate experts.

The Marshall Bridge Fund (MBF) offers investors access to secure and predictable returns from short term financing of property projects in both UK and German cities. The fund's returns are not dependent on the rise in value of any property and thus is unaffected by any volatility that may occur short term in the property values.

Managers Comments

"The NAV for April increased in line with the expected monthly returns. We foresee the returns continuing to increase over time, as the effect of the fund's fixed costs are reduced as the fund grows in volume. We closed two more loans in Germany, in line with the communicated strategy to await the outcome of the Brexit vote in June. For the remainder of May, we expect to close another loan in Germany over Euro 1.5 Million, which will leave us as 80% invested. Current LTV of the portfolio is 44%, and the average rate of the loans 1.295%. Please find details of all loans at www.marshallbridge.com"

What is the opportunity?

As the banks have drastically reduced their lending facilities to the bridge finance sector, this has created a supply shortfall which will be exploited by the fund achieving higher yields and providing lower LTVs, thus reducing risk for investors.
