

A specialised financing fund targeting 10%+ annual net returns managed by proven European real estate experts.

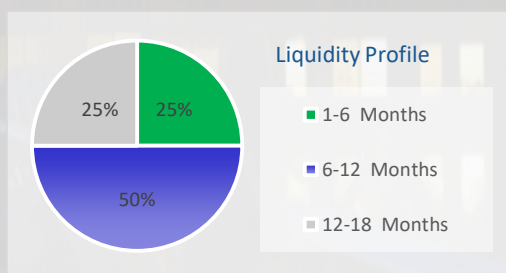

The Marshall Bridge Fund (MBF) offers investors access to secure and predictable returns from short term financing of property projects in both UK and German cities. The fund's returns are not dependent on the rise in value of any property and thus is unaffected by any volatility that may occur short term in the property values.

Managers Comments

In September two borrowers repaid their loans. At the same time, the fund extended three new loans, two in Germany and another in the UK. The liquidity of the fund is around 30% of AUM at the end of September 2016. Overall, the weighted average of the LTV is 48.81% while the liquidity of the fund has increased due to the most recent loans being of shorter term. In general, we observe the loans being repaid early, which is in line with our expectations. Please find details of all loans at www.marshallbridge.com

What is the opportunity?

As the banks have drastically reduced their lending facilities to the bridge finance sector, especially loans below 20m EUR either GBP, this has created a supply shortfall which will be exploited by the fund achieving higher yields and providing lower LTVs, thus reducing risk for investors.

Benefit for the investor

The Marshall Bridging Fund will allow investors to have access to an uncorrelated asset with double digit returns, together with the safety of a real asset as collateral.
