Managers Comments

The end of June was particularly active, with 3 loans totalling 15 mill euros being completed. As a further indication, we have also completed 4 additional loans within the first week of July. These allocations will return the fund's performance profile to the higher end of the projected return. The fund has completed 48 loans since inception with 30 currently active.

What is the opportunity?

As the banks have drastically reduced their lending facilities to the bridge finance sector, especially loans below 20m EUR, this has created a supply shortfall which will be exploited by the fund achieving higher yields and providing lower LTVs, thus reducing risk for investors.

Benefit for the investor

The Marshall Bridging Fund will allow investors to have access to an uncorrelated asset with double digit returns, together with the safety of a real asset as collateral.
